  - Alarms and Triggers;
  - Log & Reports;
  - Wireless communication.
- Temperature Set points control;
  - Scenarios control;
  - Equipments and sockets control;
  - Energy consumption control;
  - HVAC control.

## How Can We Help

### Measure Anything

KNX Server enables you to precisely measure the consumption of any device.

Predefined Measurement Units are W, kWh, V, A, %, VA, kWh, VAr, kVArh, cosφ, Hz, L, m3, m3/h, °C, lux, tanφ, unit.

Need additional measurement units?

**Talk to us.**

### Control Everything

Control your equipments using options such as RGB, Percent, On/ Off, Set Points, Timers, and others.

### On Top Of Your Business

Get notifications for every relevant event as, for example, under or over specific measurement values.

### Automate Your Daily Routines

Establish Rules to control your devices.

You can schedule actions, or create system automations based on readings from other devices.

### Powerful Reporting

Create activity reports for each device individually or by combination of various circuits and criteria.

Build custom reports by selecting which devices to analyze for a given time period.

Compare different devices, or device combinations and evaluate the efficiency of your system.
